chronotope project

"chronotope" refers to the unity of space and time, the intimate connection of the relative and the absolute. my intention is to create music that invites the listener to commune with this unified field of being, to paint soundscapes evoking introspection and connection, to awaken the subtle mind and open the heart.

this album is lovingly dedicated to my best friend and partner, larkin willis.

my deepest appreciation to john, steve, geoff, and fellow artists of relaxed machinery; i am inspired by your dedication to producing and promoting ambient music of the highest quality. please visit my website: www.chronotope-project.com
